

Class Character

- **Tipos de Caracteres**

Metodos

- isDigit(char ch)
- isLetter(char ch)
- isLowerCase(char ch)
- isUpperCase(char ch)
- isWhiteSpace(char ch)

Ejemplo:

```
import java.util.Scanner;
public class Main{
    public static void main (String args[]){
        Scanner sc = new Scanner(System.in);
        System.out.print ("Ingrese un caracter: ");
        char letra = sc.nextLine().charAt(0);

        if(Character.isUpperCase(letra)){
            letra = Character.toLowerCase(letra);
        }else{
            letra = Character.toUpperCase(letra);
        }
        System.out.println(letra);
    }
}
```
